The Colorado State Forest Service Nursery was established in 1957 and operates as a self funded enterprise within the umbrella of the Colorado State Forest Service and the Warner College of Natural Resources. We produce low cost, seedlings for conservation efforts, and proudly serve the Fort Collins, Colorado area directly from the nursery. For more information go to: [csfs.colostate.edu/seedling-tree-nursery/](http://csfs.colostate.edu/seedling-tree-nursery/)

As a service to landowners, the High Desert Conservation District works with CSFSN to take tree orders during the fall and winter and have seedling trees delivered locally during the spring for planting. In addition to providing a more local point for customers to pick up seedlings, we can offer insight into which plant species will work well in the area. We can also provide additional services and resources for anyone interested in improving their land. For more information go to: [highdesertcd.org](http://highdesertcd.org)
